---

Backend developer with more than 4 years of experience. Proficient in technologies such as **Node**, **Express**, **MySQL**, **MongoDB**, **React** and **Next** and specialized in backend and REST API development. I have experience in direct communication with the client to execute their ideas and project task management with the team.

I consider myself a self-taught learner.

I enjoy working in a team and always open to learn new technologies.

## EXPERIENCE

**FullStack Developer - [Timber.com.uy](https://www.timber.com.uy/)** — October 2023 - Present

- I am spearheading the development of a cutting-edge system for the company, overseeing critical functions including sales management, product shipments, truck fleet logistics, personnel administration, invoicing, and much more.
- These initiatives aim to optimize operations, streamline processes, and deliver exceptional value to our stakeholders, ultimately resulting in a remarkable 10% increase in sales.
- Additionally, we've optimized fuel expense tracking for shipments, making the most efficient use of resources. We've also maximized time efficiency across all aspects of the company, from the moment a customer places an order to the record-breaking delivery of the product

**Tech Stack: Node, Express, MySQL, React, Next, SQLServer.**

**FullStack Developer - [Sabat.uy](https://www.sabat.uy/)** — November 2022 - October 2023

- I am actively engaged in developing solutions for clients, directly contacting them to carry out their ideas. Thereby improving the quality of customized solutions and reducing development time by 30%.
- I manage project tasks and assign them to team members, while also leading a 3-person development team.
- Currently, I am carrying out two projects. One focuses on an animal clinical analysis laboratory, while the other involves managing a social and sports club. These projects present challenges due to the complexity of the locations and the large amount of data involved.
- I successfully managed to reduce client costs by 25% for both programs.

**Tech Stack: Node, Express, MySQL, React, Next.**

**Backend Developer - [HyC Hardware](https://www.hyhardware.com/)** — March 2021 - November 2022

- I integrated a 4-person development team. My role involved integrating different software through APIs for the company's clients, as well as developing tools for internal use within the company. I managed to reduce my company's response times to clients by half by implementing an automated WhatsApp chat. Additionally, I ensure 100% availability to customers at all times.
- I developed a messaging and notification system for clients using WhatsApp, as well as a ticketing system for support through WhatsApp, saving 50% in customer response time.

**Tech Stack: Node, Express, MySQL.**

**FullStack Developer - Freelance** — February 2019 - March 2021

- I developed customized web pages using PHP, MySQL, JS, and CSS for companies in the events sector, resulting in a 10% increase in sales.
- I worked on websites using WordPress and developed online stores with product automation, inventory management, and pricing, this led to a 30% increase in sales.
- Additionally, I developed software for companies as a large importer using PHP, MySQL, JS, and CSS, this resulted in a reduction in stock control errors, enabling the company to stay consistently updated.

**Tech Stack: JavaScript, Node, Express, MongoDB, PHP, WordPress, MySQL.**

## PROJECTS

**Vortex - <https://vortex.uy/>** - March 2019 - December 2020

- Online store with product stock and price automation through scraping.

**Tech Stack: JavaScript, Node, Express, MongoDB, PHP, MySQL, WodPress**

**Montevideo Music Box - <https://www.montevideomusicbox.com.uy/>** - May 2018 - December 2018

- Self-management website for concerts and events.

**Tech Stack: PHP, MySQL, JavaScript**

## SKILLS

**Programming Languages:** Advanced: **Node, JavaScript;** Intermediate: **TypeScript;** Basic: **Python, PHP.**

**Frameworks Tools:** Advanced: **Express;** Intermediate: **React, Next, Nest.**

**Data Base:** Advanced: **MySQL, MongoDB.**

**Tools:** Trello, Notion, Slack, Teams, Scrum. **Languages:** Intermediate B2: **English;** Native: **Spanish.**
